

Human Physiology – ALL 15 Marks Questions (2017–2020)

- | | |
|--|----------------------|
| 1. Excitation–contraction coupling in skeletal muscle | (Feb 2017) |
| 2. Nervous and chemical control of breathing | (Feb 2017) |
| 3. Cardiac output and factors affecting it | (Feb 2017) |
| 4. Mechanism of skeletal muscle contraction | (Jan 2018, Jan 2019) |
| 5. Hormones of thyroid gland & physiological actions | (Jan 2018) |
| 6. Structures and properties of cardiac muscle | (Jan 2018) |
| 7. Mechanism of smooth muscle contraction | (Apr 2018) |
| 8. Impulse transmission at neuromuscular junction with Myasthenia gravis | (Apr 2018) |
| 9. Chemical control of respiration | (Apr 2018) |
| 10. Generation of action potential in neuron | (Aug 2018) |
| 11. Phases of cardiac cycle | (Aug 2018) |
| 12. Spermatogenesis & puberty changes | (Aug 2018) |
| 13. Shock – definition, types & stages | (Jan 2020) |
| 14. Functions of glucocorticoids | (Jan 2020) |
